

Agro-Industrialisation Club of EWU

MIR TAZIA NUR ANUKA

As many as 19 student clubs are functioning in East West University (EWU) giving the students a taste of practical knowledge and experience beyond academic books.

Among them, the Agro-Industrialisation Club is the first agro-based club in the private universities

which started its journey on April 1, 2011 with the slogan "Enlightening the world with the colour of Agriculture". Recently four EWU students with an abiding interest in agriculture joined a program titled 'Firey Chol Matir Taney' of Channel-I.

The vision of this club is to facilitate a platform to students so that they can get acquainted with the diverse aspects of agriculture and contribute in this sector.

In this respect, the club organises seminars and workshops for building skills of the students and for creating awareness.

So far the club organised a seminar titled "Tilapia- a Golden Key of Career" and a workshop on "Enhancing agricultural

development through social media" at the EWU campus. Besides, for a field level experience, an outdoor workshop on "Technology and agriculture: Bridge to a new possibility" was organised in Manikgonj.

Recently, an exhibition and seminar on "Agro exposition and idea sharing" was held on EWU campus.

The purpose of this event was to enrich students' knowledge about participating in an organisation and as well as motivating them to build agro-based industries along with developing themselves as successful entrepreneurs in the future.

Through these activities students will be able to contribute in the agricultural sector as well as the economy of Bangladesh. Furthermore as a student and member of the club, we have learned that as a citizen of Bangladesh it is our responsibility to use our innovative and creative skills for the welfare of our beloved nation.
