

EWU Agro-industrialisation Club visits sugar refinery factory

MIR TAZIA NUR ANUKA

RECENTLY EWU Agro-industrialisation Club visited Abdul Monem Sugar Refinery Limited located in Protap Nagar, Sonargaon of Narayanganj.

The main purpose of visiting the factory was to enhance knowledge on Bangladeshi agro-based industries. Before the visit, the students have had an idea that the factory would not be a big one but surprisingly it was indeed a big factory consisting of administrative building, small garden and canteen.

Moreover it is a fully automated modern factory with various kinds of instruments and machineries. This factory's

production starts with raw materials which are brought from Brazil.

After the production is complete the packets of sugar are bought by many renowned companies of Bangladesh.

Furthermore, the main products of this factory are White Sugar, Sugar ICUMSA <45, Sugar ICUMSA <100, Blended Sugar and Pharma Grade Sugar. And the main markets of the factory are Eastern Europe, Southeast Asia, Western Europe, Northern Europe and Southern Europe.

The visit to the sugar factory helps students to have the knowledge of the whole process of how the sugar is produced and have a practical experience of how they ensure the quality.
